HYGIENIC EQUIPMENT FOR FOOD & LIFE SCIENCES

## KUS-50 Mixing Bowl Unloading System

The Murzan KUS-50 is the ultimate solution for unloading contoured mixing bowls. Used in applications that no pump alone can handle, the system unloads viscous icings, batters, and fillings with delicate solids up to 3 inches (76mm), cleanly, quickly and with no change in consistency on most products. Additionally, the Murzan KUS-50 conforms to FDA requirements for approved materials, is CIP capable, and incorporates the USDA listed Murzan PI-50.

### **Advantages**

- EASY TO CLEAN
- Cleanly empties contoured mixing bowls without altering product consistency or density on most products
- Improved gentle treatment of the product and faster unloading compared to other methods
- Provides sanitary, hands-off solution for unloading mixing bowls

**Gillain & Co**

HYGIENIC EQUIPMENT FOR FOOD & LIFE SCIENCES

- Can feed multiple depositors from one location
- Portable for cleaning and easy changeover
- Designed for CIP capability

### **Applications**

- Batters
- Icings
- Fillings
- Other viscous products

### **» Easy to Clean**

Our design allows for complete visual inspection of the wetted parts. There are no blind spots or crevices where bacteria can grow. Designed for CIP capability.
