UltraWasher™

Gillain & Co

HYGIENIC EQUIPMENT FOR FOOD & LIFE SCIENCES

About Us

Suncombe Limited is an organization dedicated to the advancement of Clean in Place (CIP) and Hygienic processing technology. We have always targeted leading-edge technologies. Our mission is to utilise forward-thinking expertise that anticipate and satisfy the needs of cleaning and hygienic processing requirements of the future.

Introduction

The Suncombe UltraWasher range has been developed over 40 years of Washing, Cleaning, Sterilising and Drying requirements. UltraWashers are used to provide a method of carrying out high quality, repeatable, validatable cleaning of portable or moveable parts and components that cannot be cleaned in place. The range is based on standard modules with individual units custom designed and built in-house for specific applications.

Versions

Parts Washers—standard or custom designed trays, racks and baskets.

Drum Washers—fixed or removable racks, can include inverters and tippers.

Tray/Pallet Washers—in line or rotary versions. Automatic or manual feed.

Combined Units—any combination of washers can be built into a single unit.

Basic Units—cleaning fluids supplied from a mobile or static CIP system.

Design Options

Wash all types and sizes of IBC's, Cone Valve, Butterfly Valve, Drums, VATs, containers & others.

Number of doors & hinge orientation to suit facility layout and goods movement.

Systems integrated neatly into GMP facility with support services located in technical spaces.

Buffer water storage tanks.

Multiple detergent/sanitiser additions

International design guidelines — cGMP, PED, ASME BPE, CE, GAMP, ISPE, FDA, 21CFR11, ATEX & EHEDG.

Communication with other systems such as DCS.

Validation package with supporting documentation.

Available with CIPSuite#™1, 2, 3 or 4 control systems, from simple cycle control to full recipe control with 21CFR11 compliance.

UltraWasher Specification

Floor mounted booth adjustable level

Loaded manually or by forklift or pedestrian stacker truck

All stainless steel 316/316L construction with insulation

Fully Drainable

Open bottomed or sealed base versions available. Pit mounted or floor standing.
